- ✓ Github
- ✓ VScode

## EDUCATION

### Full Stack Software Engineering Bootcamp

Makers Academy  
2021

### BSc Business Management, Degree

Cardiff University  
2015

### Economics A\* | Business Studies B, | Philosophy B, A Level

Tring School  
2012

## CAREER OBJECTIVE (\*\*\*\*THIS IS WORK IN PROGRESS\*\*\*\*)

Throughout my career, I have specialised in client-facing and account management roles. I have maintained an excellent new business track record led to promotion to Senior Business Development Manager within 7 months of joining MVF Global. I pride myself on my exceptional interpersonal and communication skills with stakeholders at all levels, as well as my eye for opportunities and a natural drive to succeed.

## PREVIOUS EXPERIENCE

### Business Development Manager (Growth Team) | MVF Global

(April 2019 – September 2021)

I am responsible for Researching, Selling, Launching and Account Managing new industry launches. I've recently originated and implemented a new business model, CPC, in an industry we had no prior experience in. I was promoted into a senior role as a Business Development Manager (Growth Team) 7 months after joining the company.

### Support, Business Analyst and Business Development | Sabrefish (SaaS)

(Sept 2017 – March 2019)

Learning a completely new SaaS platform from scratch, I began solving complex technical system faults using technical documentation and advanced SQL. I was quickly promoted from solving tech support issues to a client-facing Business Analyst and Business Development role. I was the direct point of contact for our Key Client, and also assisted our CEO with new business client pitches.

### Assistant Procurement Manager | Laing O'Rourke

(Sept 2015 – August 2017)

After graduating from Cardiff University I joined the Laing O'Rourke Graduate programme and was on track to become a Procurement Manager. It was here that I created a full P2P system in just excel/vba, with no prior coding knowledge. I created numerous tech guides for our CRM system, and lead training sessions teaching users how to speed up their workflow with tech shortcuts.
